SUMMARY

QA Engineer who has tested 3+ client web and mobile products and automates web tests with Playwright and Cypress in JavaScript. Skilled in API testing with Postman, data validation with SQL, load testing with JMeter, and defect tracking in Jira within Agile/Scrum teams. MS in Computer Science (2026), with hands-on experience evaluating machine-learning model predictions.

EXPERIENCE

Quality Assurance Engineer — Develpify Studios, Lahore, Pakistan

Jan 2026 – Present

- Tested 3+ client products, including a coffee shop website, an e-commerce store and a map-based application, across web and mobile.
- Wrote and executed 100+ test cases from requirements, covering functional, regression, smoke and cross-browser scenarios and verifying business rules end to end.
- Reported 50+ defects in Jira with clear steps, expected vs actual results, severity and evidence, and retested fixes before release.
- Automate web regression scenarios with Playwright and Cypress (JavaScript), cutting repeated manual checks before each release.
- Test REST APIs in Postman, covering methods, authentication, headers, status codes and error handling.
- Validate backend data with SQL (filters, joins) and run load tests with JMeter.
- Collaborate with developers through sprint planning, development and release in Agile/Scrum.

Graduate Researcher (MS Thesis) — University of Management and Technology, Lahore

2025 – Oct 2026

- Built a lightweight Zero Trust trust engine for IoT devices with Isolation Forest anomaly detection (Python), tested on simulated IoT traffic.
- Evaluated model predictions using detection accuracy, precision, recall, F1-score and false-positive rate; analysed misclassified cases.
- Benchmarked results against published models in a comparison table with graphs for the thesis results chapter.

Computer Science Teacher — Allied School, Bisma Campus, Lahore, Pakistan

2 years

- Taught computer science to students up to Grade 10.
- Mentored students one-to-one on coursework and projects.

Visiting Faculty (Internship) — Govt. Graduate College for Women, Lahore, Pakistan

4 months

- Taught computer science classes to undergraduate students.

TECHNICAL SKILLS

- **Automation:** Playwright, Cypress (JavaScript)
- **API and performance:** Postman, REST APIs, JMeter
- **AI / ML testing:** model prediction evaluation (precision, recall, F1, false positives), anomaly detection (Isolation Forest), dataset quality review, error analysis
- **Languages:** JavaScript, Python, SQL
- **Tools:** Git, GitHub, Jira, VS Code, Chrome DevTools
- **Methods:** test case design, regression and release testing, Agile/Scrum, SDLC

PROJECTS

- **Dataset Quality Checker** — web tool that reviews research datasets and flags data quality issues before analysis or model training.

- **Zero Trust IoT simulation** — trust engine with Isolation Forest anomaly detection and model evaluation; code on GitHub.
- **Web test automation** — Playwright and Cypress suites with locators, assertions and regression scenarios.
- **API test collections** — Postman tests for positive and negative cases, authentication and response checks.
- **Lead scraper (Python)** — collects business listings from Google Maps and Yellow Pages; SQLite job storage and grid-based search.
- **Chrome extension testing tool** — browser extension that supports manual web testing.

EDUCATION

MS, Computer Science — University of Management and Technology (UMT), Lahore
Completed October 2026 · Thesis: Lightweight Zero Trust Architecture for Resource-Constrained IoT Devices

Master of Computer Science (MCS) — University of Management and Technology (UMT), Lahore
2-year degree after BCS; equivalent to a 4-year bachelor's (16 years of education)

Bachelor of Computer Science (2 years) — Punjab Group of Colleges, Lahore

LANGUAGES

English: B2 (upper-intermediate) — TOEFL iBT scheduled November 2026 · **Urdu:** Native
